

TECHNICAL SPECIFICATION

Guar Gum – Technical [Fracking Grade -2]	Application- Petroleum Industry
-----------------------------------------------------	----------------------------------------

Description	Guar Gum – Technical [Fracking Grade -2] is a high molecular weight hydrocolloid polysaccharide-Galactomannan-obtained from the ground endosperm of Cyamopsis tetragonoloba. E.E.C. No.: E-412.CAS No.: 9000-30- 0
Grade	Fracking Grade Guar Gum
Appearance	Fine Powder
Colour	Dull White to Slightly Yellowish
Aroma	Typical Beany Aroma
Loss on Drying	8 % Maximum
Ash content	1 % Maximum
Protein	4.5 % Maximum
Acid insoluble matter	2.5 % Maximum
Water soluble polymer (by difference)	82 % Minimum

Viscosity (40 lbs / 1000 gal., 2% kcl, 1 hr @ 511 sec⁻¹)	3min-35 cps 5 min-37 cps 60 min-40cps
---------------------------------------------------------------------------------------	------------------------------------------------------------------

Mesh size	
Through 200 #	99% Min
